

Road Safety Analysis Dashboard

This dashboard provides a comprehensive analysis of road safety data, focusing on various causes of accidents across different states and union territories in India. The data includes statistics on over-speeding, drunken driving, driving on the wrong side, jumping red lights, and the use of mobile phones, among other factors. The visualizations aim to highlight key trends and insights to aid in understanding and addressing road safety issues.

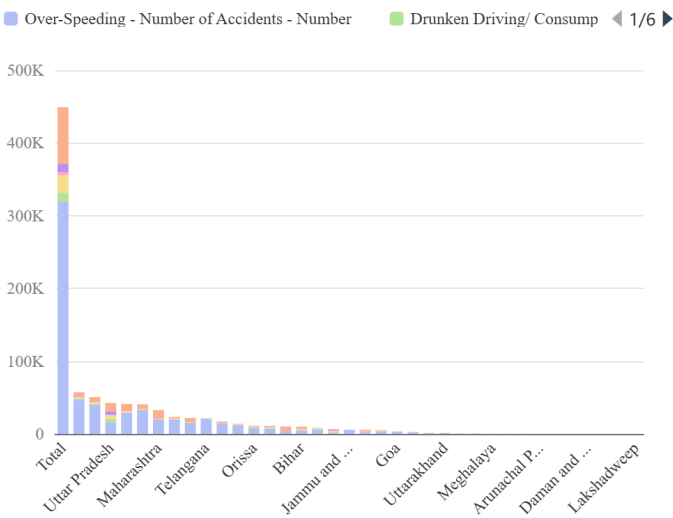

Proportion of Total Accidents by Factor

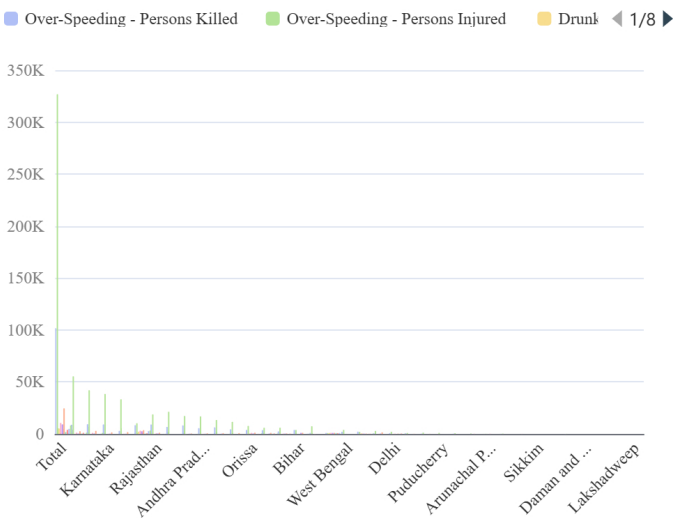

Trend of Total Accidents by Factor

Total Number of Accidents by Factor for Each State

Comparison of Persons Killed and Injured by Factor

Accident Factors Summary

| Factor | Total Accidents |
|---|-----------------|
| Over-Speeding - Number of Accidents - Number of Accidents | 638056 |
| Drunken Driving/ Consumption of alcohol and driving | 24512 |
| Driving on Wrong side - Number of Accidents | 48862 |
| Jumping Red Light - Number of Accidents | 8886 |
| Use of Mobile Phone - Number of Accidents | 21044 |
| Others - Number of Accidents | 156644 |
